PROCEDURE FOR BEDBUG TREATMENT

1. Remove all bedding and linens from all mattresses and wash & dry in the hot cycle. Also remove all items from underneath the bed, discard infected items or wash & bag accordingly. Sofas, chairs (if slept on) must be stripped.
2. Mattress and box spring should be discarded if heavily infested. If mattresses are being treated, they should be covered afterward with zip-up mattress covers/encasements which can be purchased directly from us. Call us for pricing.
3. Empty all drawers & bottoms of closets. All linen, bedding & clothing near beds must be washed & dried in hot cycles. Items must be placed in clean, sealed plastic bags when laundered. (Please throw old bags away & use clean bags to put cleaned laundry in when bringing home) *Depending on infestation technician may recommend completely emptying closet.

******Also, please wait 7 - 10 days after the second or third treatment (depending on infestation) to return all items to the dressers & closets. Items that are not washable should be bagged or binned with a Nuvan Pro Fumigation Strip******
4. All bagged items must be placed in the kitchen or dining room so that it does not impede the treatment process by being an obstruction.
5. Remove all furniture at least six (6) inches away from the walls which give us access to treat all areas.
6. Remove all hanging pictures from wall & curtains. Vacuum the back of each picture and place them in one area of your home for treatment. Curtains may be washed or discarded.
7. If bookcases or shelves are within six (6) feet from the bed, please remove all CD's and books from book cases and examine closely for bedbugs. These items may be wiped down with a damp cloth and placed in a plastic bag and/or bagged or binned with a Nuvan Pro Fumigation Strip.
8. Vacuum entire house prior to service and take vacuum cleaner outside to empty and throw away bag. (Steam vacuum where possible)
9. Discard all cardboard boxes, shoe boxes, old magazines, newspapers, plastic & paper bags (de-clutter, de-clutter, de-clutter).

BEDBUGKING1@VERIZON.NET

10. Please remove all electrical outlets within 5 feet from bed or sofa/couch, so that our technicians may pump bed bug powder into the outlets.

11. Technician shall apply insecticides as follows:

- a) Residual chemicals to bedrooms & living room.
- b) Spot application of a hand held aerosol for hard to get areas.
- c) Growth regulators to stop breeding.
- d) Powder (dusts) to outlets.

Please note: customer is responsible for removing & replacing outlet covers in bedrooms & living room.

Failure to discard infested furniture, property or personal effects will automatically VOID your guarantee & we will not return until the items have been properly discarded.

Please remember to open windows and air out apartment after technician is done. All occupants must remain out of the treated area for approximately three (3) hours after the treatment is completed, or until all treated surfaces are dry. If you have asthma or any other breathing problems you may want to leave for 24 hours. Do not walk on floors barefoot or lie on your bare mattress until material is dry. After all material has dried you may put clean sheets on your mattress. Please do not use your own over-the-counter material such as Raid, etc. over our chemicals.

Our treatment is to target the hiding areas and treat them appropriately; the more access we have in your home, the greater the chance we have of eliminating them quickly. After treatment is performed and material is dry, we highly recommend using mattress covers on all mattresses. We can supply those for you at an additional cost providing you let us know in advance.

As a matter of convenience, you can treat each of the stored items in plastic bags or bins using a product called Nuvan Pro Strips which utilizes controlled-released technology to kill bedbugs inside the bags of stored items. Each bag or bin must be contained for at least 7 days after which you can remove the strips from the bags. But we recommend they stay bagged or binned for the duration of your treatment.

FOR YOUR ADDED CONVENIENCE WE SELL NUVAN PRO FUMIGATION STRIPS, THE COST IS \$69.00 FOR ONE DOZEN & WE ALSO CARRY "THE VERY BEST ~ TOP OF THE LINE" MATTRESS ENCASEMENT'S FOR MUCH CHEAPER THAN YOU WOULD PAY AT SEARS, SEALY'S OR BED BATH & BEYOND.

If the person/s infested are unable to complete the preparation steps listed above we can refer a Prep company that can assist you with the procedure

Non-compliance with these procedures render guarantee null & void.

SUCCESS DEPENDS ON COOPERATION
